

NIRANJAN PP

BCA Graduate | Data Analyst | Data Science & AI

Phone: 7736203647 | Email: ninjuniranjan007@gmail.com

LinkedIn: <https://www.linkedin.com/in/niranjan-pp>

GitHub: <https://github.com/niranjann007>

Location: Bengaluru

Languages: Malayalam, English

Career Objective

BCA graduate specializing in Data Science and Artificial Intelligence with hands-on experience in Python, SQL, Power BI, Machine Learning and data visualization. Passionate about transforming data into actionable insights and building practical AI/ML solutions. Seeking an entry-level opportunity as a Data Analyst, Data Scientist or AI/ML professional.

Technical Skills

Programming Languages : Python , C, Java ,SQL

Data Analytics : Pandas, Numpy, Power BI, Matplotlib, Seaborn, Advanced Excel

Machine Learning & AI : Scikit-learn, PyTorch, Natural Language Processing(NLTK),Machine Learning

Databases : MySQL

Web & Deployment : React.js,Streamlit, HTML5, CSS3

Tools & Platforms : Git, GitHub, VS Code

Core Concepts : DBMS, OOPs, Computer Networks, Data Structures & Algorithms

Academic Projects

Fake News Detection Using Social Media Data | TCS iON Industry/Internship Project

- Developed an end-to-end Machine Learning system to classify news articles as real or fake using NLP
- Implemented text preprocessing, tokenization, and feature extraction using TF-IDF Vectorizer.
- Trained and optimized classification models using Naive Bayes and Logistic Regression.
- Deployed the final model as a real-time Streamlit web app with GitHub version control.
- Technologies used: Python, Pandas, NLTK, Scikit-learn, Streamlit, Git.

YouTube Trending Video Analytics | Data Analytics Project

- Analyzed YouTube trending video datasets to identify user engagement and category trends.
- Cleaned and preprocessed unstructured data using Python (Pandas).
- Built an interactive Power BI Dashboard with advanced data visualizations for business insights.
- Technologies used: Python, Pandas, Power BI.

Gas Leakage Detection System | IoT Academic Project

- Built a real-time gas leakage detection system using microcontrollers and gas sensors.
- Programmed an automated alert mechanism featuring buzzer sounds and LED indicators for instant hazard mitigation.

Education

• BCA in Data Science and Artificial Intelligence

Yenepoya (Deemed to be University), Mangalore
(2023 - 2026) | CGPA:8.46/10

• 12th - State Board

K.M.G.V.H.S.S, Tavanur | Govt. of Kerala (2021 - 2023)

• 10th - State Board

A.V.H.S.S, Ponnani | Govt. of Kerala (2020 - 2021)

Internship Experience

TCS iON — Applied Industry Projects (AIP)

Industry Project Intern | Nov 2025 – Feb 2026

Fake News Detection Using Social Media Data | 135 Hours

- Completed a 135-hour industry project under the TCS iON Applied Industry Projects program.
- Developed an NLP-based machine learning system for fake news classification.
- Performed text preprocessing, tokenization and TF-IDF feature extraction.
- Implemented and evaluated Naive Bayes and Logistic Regression models.
- Developed an interactive Streamlit application for real-time prediction.
- Technologies: Python, Pandas, NLTK, Scikit-learn, Streamlit, Git/GitHub.

Certifications

- Google Advanced Data Analytics Professional Certificate – Coursera
- Microsoft Power BI Data Professional Certification - Coursera
- Introduction to Artificial Intelligence – Infosys SpringBoard
- Deep Learning Specialization – Illinois Institute of Technology
- Data Analysis with R – Duke University
- Certified AI Prompter(One Million AI Prompts Initiative) - Dubai Future Foundation & Dubai Government
